## **Cummins Inc. selling exhaust business to Global Tube as it places greater emphasis on key Emission Solutions business**

PUNE – Cummins Inc. has announced that it has entered into an agreement to sell its exhaust business to Global Tube, a portfolio company of Wind Point Partners, a private equity firm headquartered in Chicago, Ill. Consequently, the joint venture partners in India; Cummins India Limited and Cummins Filtration Inc. USA will be divesting their shares in Cummins Exhaust India Limited.

“The sale to Global Tube will allow us to bring focus to the Company’s Emission Solutions (CES) business, which specializes in providing a range of aftertreatment solutions and technologies to control emissions in diesel engines. With ever tightening emission standards there is a need to place greater emphasis and resources on the deployment of after treatment technology and products that are critical to Cummins’ growth strategy,” said Anant J. Talaulicar, President of the Components Group, Cummins Inc. and Managing Director of Cummins Group in India. The Emission Solutions business is part of the Components Group.

“This is a very exciting opportunity for us to invest in a business which is central to our strategy and has significant opportunity for growth,” said Thomas Gosnell, Chief Executive Officer of Global Tube. Gosnell, a former executive with Arvin Meritor and Rockwell Automotive and 30 year veteran of the Commercial Vehicle industry, has said that the new business will operate under the name Nelson Products, with its headquarters in Stoughton, Wisc. Nelson is a familiar name in the exhaust business which will be revitalized under the new ownership.

The exhaust business is expected to transfer to Global Tube by the end of March 2011 along with Cummins’ acoustic exhaust operations in Stoughton, Arcadia, Black River Falls and Viroqua, all in Wisconsin, as well as in Scoresby, Australia. During the transition period, Cummins will continue operating the business, providing the products and support that customers expect. Cummins and Global Tube are working to ensure a smooth transition for customers, suppliers, employees and the communities where the businesses are located.
